Summary

Detail-oriented Software Engineer with 4+ years of experience developing and maintaining scalable web applications. Skilled in modern programming languages, cloud platforms, and Agile methodologies. Strong collaborator with a track record of delivering high-quality software on time and within scope. Passionate about building user-friendly solutions and continuously learning emerging technologies such as artificial intelligence, machine learning, and cloud-native applications.

Technical Skills

Languages: Java, Python, JavaScript (React, Node.js), TypeScript, C++

Frameworks: React, Next.js, Spring Boot, Express.js, Django

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud/DevOps: AWS, Docker, Kubernetes, Git, Jenkins, CI/CD pipelines

Other: REST APIs, GraphQL, Unit Testing, Agile/Scrum, Test-Driven Development (TDD)

Professional Experience

Software Engineer — TechWave Solutions, San Francisco, CA

Jan 2021 – Present

- Designed and developed scalable microservices in Java and Node.js, reducing system downtime by 30%.
- Implemented CI/CD pipelines with GitHub Actions and Docker, improving deployment speed by 40%.
- Optimized database queries in PostgreSQL, cutting average response time by 25%.
- Collaborated with a team of 8 engineers using Agile, consistently delivering features within sprint deadlines.
- Mentored junior developers, leading to faster onboarding and reduced code review issues.

Junior Software Engineer — BrightApps Inc., San Jose, CA

Jun 2019 – Dec 2020

- Built front-end features with React and integrated REST APIs for an e-commerce platform serving 50k+ users.
- Wrote unit and integration tests, increasing code coverage from 60% to 85%.
- Supported migration of legacy PHP application to Node.js, improving maintainability.
- Partnered with UX designers to enhance customer checkout flow, resulting in 15% increase in conversions.
- Automated deployment scripts with Jenkins, cutting manual release steps by 70%.

Projects

Portfolio Builder Web App — github.com/janedoe/portfolio-builder

- Developed a customizable portfolio generator using Next.js and Supabase.
- Implemented user authentication, template themes, and image upload features.
- Deployed application on Vercel with continuous integration.

Movie Recommendation System

- Built a Python-based ML model using scikit-learn to recommend movies with 82% accuracy.
- Deployed the model as a Flask API and integrated it into a React front end.
- Conducted A/B testing with 200+ users, improving recommendation relevance by 18%.

Task Manager Mobile App

- Created a cross-platform mobile app using React Native for task tracking.
- Integrated push notifications and offline storage using SQLite.
- Achieved 1,000+ downloads with positive feedback on UI/UX.

Education

Bachelor of Computer Science — University of California, Berkeley, CA

2015 – 2019

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Databases, Machine Learning, Software Engineering.

Certifications

- AWS Certified Solutions Architect – Associate
- Oracle Certified Java Programmer

Additional Information

- Contributor to open-source projects including React libraries.
- Regularly mentor junior developers through online coding communities.
- Active participant in local tech meetups and hackathons.
